

50 Tons of Cannabis Zapped

August 05, 2010

The  Moscow Times

Interior Ministry planes have discovered a 17-hectare field of wild-growing cannabis near the village of Poltevo in the Moscow region, Interfax reported Thursday.

Fifty tons of the plant were destroyed with “special equipment” after experts confirmed that the weed contained the psychoactive substance tetrahydrocannabinol, the report said, citing a law enforcement source.
