December 05, 2010

The  Moscow Times

TNK-BP Holding, the unit of TNK-BP that holds most of the venture's assets, was admitted to trading on Moscow's MICEX and RTS exchanges from Monday, according to statements from the bourses.

MICEX said TNK-BP's ordinary and preferred shares would be included in a type of sub-listing that does not require a specific level of liquidity. TNK-BP shares had been traded on the RTS Board, the RTS division for non-liquid stocks, where trades are not regulated.
