The  **Moscow Times**

TNK-BP will triple investment in a natural gas development next year as it gains transit capacity.

TNK-BP plans to spend \$250 million tapping the Achim layer at its Rospan International unit's Urengoi field next year after spending \$66 million there this year, the company said Tuesday.

TNK-BP said last year that it plans to increase Rospan's production fivefold to more than 16 billion cubic meters a year after agreeing on space in the pipeline network, which belongs to Gazprom. Rospan sold 1.6 bcm of gas in the first half of this year, according to a July 26 presentation by TNK- BP.
