Espro Group has leased the entire Leshkova office and warehouse complex under construction in the Istra district, Moscow region, to Santens Service, which provides customs clearance and logistics services for pharmaceuticals in Russia, under a 10-year contract.

The total area, including office and mezzanine space, is 27,000 square meters. Investment in the project totaled \$30 million. The delivery date for the warehouse is the second quarter of 2013.

Leshkova meets all international standards for the storage of pharmaceutical products. "It's a real build-to-suit," said Pavel Platonov, commercial director at Espro Management.
