Between 2013 and 2015 municipal authorities plan to build from scratch or reconstruct 17 major road intersections, City Hall's construction department said, Vedomosti reported.

Currently, a direct exit onto the Garden Ring from Ulitsa Podolskikh Kursantov is being built. The intersection where the MKAD and Dmitrovskoe Shosse meet is also being redone, the result of which will be a three-level fully functional interchange.

New intersections are now being designed for where the MKAD meets with Leninsky, Michurinskiy, Ryzanskiy, Volokolamskiy and Volgograskiy Prospekts, as well as where it crosses Shcholkovskoe and Kashirskoe Highways and Profsoyuznaya Ulitsa.
