Pope Francis Says Russia Is Needed to Solve World Problems

September 22, 2015

Pope Francis (C) gestures after blessing the city from the Hill of the Cross (Loma de la Cruz) in Holguin, Cuba.

Pope Francis has said Russia plays a crucial role in solving the world's problems, a TASS news agency report said.

“Without Russia, not one of today's most pressing global problems can be solved,” the pontiff was cited Tuesday as telling a TASS reporter aboard a flight to Cuba.

The pontiff continued his journey on Tuesday to the United States, where he is set to address the UN General Assembly on Friday, the report said.
