

Russian Deep-Sea Fisher Shares His Monster Discoveries on Twitter

December 20, 2016

Roman Fedortsov / Twitter

Roman Fedortsov works on a fishing trawler based in Murmansk, a port city in the extreme northwest part of Russia. Earlier this year, he started [tweeting photographs](#) of his most unusual catches.

Most deep-sea fishers would likely smile or shrug at his pictures, given the variety of creatures regularly pulled up in nets, but the images are perfectly monstrous to your average land-lover.

Earlier this week, the website Ruposters highlighted some of Fedortsov's [most terrifying discoveries](#).

— Роман Федорцов (@rfedortsov) [December 14, 2016](#)

“Aha! Caught another one of these guys. :-)”

Many of the fish Fedortsov pulls out of the water look quite dangerous, but he regularly handles the creatures without any trace of fear.

— Роман Федорцов (@rfedortsov) [December 12, 2016](#)

“Here's another Macrourus. The scales are like sandpaper. #Fishing #BarentsSea”

Some of Fedortsov's catches even look like the monsters from Ridley Scott's “Alien” motion picture.

Задумчивая [#акула](#). [#улов](#) [#рыба](#) [#промысел](#) [#Баренцево_море](#) pic.twitter.com/MNexSBXTqG

— Роман Федорцов (@rfedortsov) [November 2, 2016](#)

“A shark in deep thought.”

Follow Fedortsov's tweets, and you'll also get a sense of life as a Russian fisher, where a little salty humor is part of the job.
