Tsarist-Era Rooms With a View

February 10, 2017

The Old Fund Instagram account is one grand illustration of pre-revolutionary St. Petersburg. The account's founder Maxim photographs the city's interiors that miraculously survived the upheavals of the Bolshevik era and the Soviet Union.

His collection is an exhibition of Russian Empire stoves, fireplaces, parquet floors, wooden windows, double doors, and unique balcony views. The Moscow Times brings you on an online walk through the most memorable rooms
