

Stranded Whale Swims to Freedom in Russia's Far East

August 11, 2017

Sergey Dolya / Facebook

A 13-meter-long whale that became stranded on an island in Russia's Far East has safely returned to sea, Environment Minister Sergei Donskoi [wrote](#) Friday on Facebook.

The whale beached itself on a sandbank in a river estuary on the Bolshoi Shantar island in the Sea of Okhotsk on Thursday and injured its tail struggling to break free, [receiving](#) nationwide media coverage.

But Donskoi said the animal had been able to swim to the sea when the tide came in and rescuers were monitoring its progress.

“Thank you to everyone who took part and was concerned,” he wrote. “The whale is saved!”
