SpaceX CEO Elon Musk has expressed his admiration for Russian rocket engineering in a [tweet](#) on Thursday.

Musk’s tweet came in response to an article [posted](#) by the tech outlet Ars Technica, which said that the Russian Soyuz spacecraft cannot compete with SpaceX's Dragon spacecraft. Last December, the SpaceX CEO also praised the design of Russia’s RD-180 liquid-fueled rocket engine.

“Russia has excellent rocket engineering & best engine currently flying,” Musk tweeted.
