A series of explosions rocked a Russian ammo depot in Siberia for the second time in a week on Friday, injuring five people, the state-run TASS news agency cited doctors as saying.

A fire broke out following the explosions at the site in the Krasnoyarsk region, TASS reported.

The explosions were caused by a lightning strike, Interfax [cited](#) an unnamed source as saying.

Explosions ripped through the same site on Monday, killing one, injuring 13 and prompting authorities to evacuate thousands of people from nearby areas.
