Flacon & Hlebozavod **MoscowLiving**

Flacon and Hlebozavod are two former Soviet factories nicely renovated and converted to modern urban centers for design, shopping, exhibitions and events. Situated side by side from each other and not far from the city center, Flacon and Hlebozavod make a perfect destination for a family- or friends time out. We really enjoyed strolling around in a cool environment, shopping clothes and accessories in non-chain stores, buying Asian ingredients for cooking, watching people, stopping for coffee and snacks in cool tiny places and taking pictures against artistic backgrounds. An automatic storage where we could leave our sneakers for cleaning was another exciting addition to our exploration tour. We are ready to share our favorites with you, but only if you promise to share yours, as we have just started exploring this urban neighborhood.

This shop carries the very trendy Scandinavian clothing brand Rains, designed for bad weather.

Trendy designs and colors at this shop which sells clothes and accessories.

All clothes are designed in Russia and prices are quite affordable. We like to buy our outfits outside chain-stores, because it reduces the risk to meet someone on the street in the same dress.
