

Moscow Resorts to Fake Snow for New Year Festivities

December 30, 2019

Twitter

Authorities have brought artificial snow to central Moscow for New Year celebrations as the Russian capital experiences the highest December temperatures in more than a century.

Moscow [broke an 1886](#) record earlier this month, reaching 5.4 degrees Celsius on Dec. 18. Average temperatures for the month are usually below minus 6 degrees. Forecasts for the New Year holiday, Russia's main festive celebration, predict rain instead of snow.

Muscovites posted pictures of heaps of snow in [Zaryadye Park](#) and [Tverskaya Street](#) on social media Friday and over the weekend.

“It’s not festive at all,” one resident dressed as the fairy tale snow maiden Snegurochka [said](#).

“It’s already turned beige or gray,” said another resident, dressed as Russia’s version of Santa Claus.

In the center, there is the Instagram logo. Below the logo, the text "Посмотреть эту публикацию в Instagram" is displayed in blue. At the bottom, there are several horizontal bars representing the post's content, and a footer line that reads "Публикация от Sergey Pedchenko (@sergey_pedchenko) 28 Дек 2019 в 12:17 PST".

The snow came from the city's ice rinks and will be used to create snowboarding slopes, First Deputy Director of the Mayor's Office Alexei Nemeryuk [told](#) Interfax.

The lack of snow has also caused flowers to bloom early at Moscow State University's Apothecary

Garden. Snowdrops and rhododendrons there mistook the soft soil for the onset of spring.

The image shows a placeholder for an Instagram post embed. It features a grey profile picture in the top left corner, followed by a horizontal line representing the name and a shorter line for the handle. In the center is the Instagram logo. Below the logo is a blue link that reads "Посмотреть эту публикацию в Instagram". At the bottom, there are several grey bars representing the post's content, a horizontal line, and a caption area with two more grey bars. The footer text reads "Публикация от Maria* (@mariksa_10) 27 Дек 2019 в 9:53 PST".

An atmospheric front from the Atlantic Ocean has caused the unseasonable warmth.

Russia [remains](#) a relatively climate-skeptic nation, with recent polls saying that less than half of Russians believe climate change poses a major threat to their country.
