

Russia's Response to the Coronavirus: The 2020 Timeline

By [Leyla Latypova](#)

December 21, 2020

Russia's total coronavirus deaths surpassed 51,000 by late December. **Sergei Ilnitsky / EPA / TASS**

As the year of the coronavirus draws to a close and Russia's total number of cases approaches 3 million, it's time to look back at how the world's largest country handled the pandemic.

From the step-by-step closure of its borders at the beginning of the year to the mass roll-out of its domestically developed Sputnik V vaccine, here is a snapshot of Russia's coronavirus timeline and The Moscow Times' reporting on all angles of the crisis:

January

— As the coronavirus starts spreading outside China, Rospotrebnadzor head Anna Popova first [hints](#) at Russia's plans for the development of a vaccine on **Jan. 22**

— Following the [suspension](#) of air traffic with the Chinese city of Wuhan on **Jan. 24**, Russia

[bans](#) the arrival of all tour groups from China.

— On **Jan. 31**, Russia reports its first two coronavirus cases — one in the Tyumen region in west Siberia, and the other in Russia's Far East. The [closure](#) of the country's Far East border with China comes into effect the same day.

February

— Russian military planes fly to Wuhan to evacuate stranded Russians on **Feb 4**. All arrivals are [quarantined](#) in a camp in Siberia, where some even manage to [find](#) love.

— A Russian passenger onboard the Diamond Princess cruise ship quarantined in Yokohama in Japan becomes the first Russian citizen to be diagnosed with the coronavirus, Russia's Embassy in Japan [announces](#) on **Feb. 17**.

— Following the suspension of railway services and most flights to and from China, Russia [bars](#) entry for Chinese citizens starting **Feb. 20** — one of the first countries to impose a blanket ban.

— Russia stops issuing visas to most Iranian and South Korea citizens from **Feb. 28**.

March

— Moscow [confirms](#) its first coronavirus case on **March 2** and Mayor Sergei Sobyenin introduces measures to slow the spread of the disease. Body temperature checks are introduced in Moscow's airports and Russians returning from coronavirus epicenters are ordered to self-isolate.

— Russia starts laboratory tests of the first coronavirus vaccine prototypes, the Vector Institute [announces](#) on **March 16**. Russia's scientists vow to present the most promising prototypes in June.

— As the number of confirmed coronavirus cases nears 200, Russia [bans](#) entry to most foreign nationals from **March 18**. Russia's coronavirus patients [report](#) online bullying, threats and intimidation amid the growing stigma.

— After Russia [confirms](#) the first coronavirus death on **March 19**, the government [announces](#) a "high alert" status for all 85 of its regions. With infection numbers growing, rich Russians start buying [ventilators](#) to protect themselves.

— President Vladimir Putin announces a non-working week from March 28 to April 5 in an address to the nation aired on **March 25**.

— Russia [halts](#) all international air traffic on **March 27** and [closes](#) all border crossings from **March 30**. Hundreds of migrants workers are [stranded](#) in Moscow's airports.

— After Russia's total number of confirmed cases surpasses 1,000, Moscow [enacts](#) a citywide lockdown from **March 30**. Most other regions follow suit and small businesses across the country [prepare](#) for the worst.

April

- Putin [announces](#) an extension of the nationwide non-working week until **April 30** in a second televised address that aired on **April 2**.
- Russia's republic of Chechnya [closes](#) its borders from **April 5**. A messianic [cult](#) in Siberia takes the opposite approach, opening up to new followers.
- Moscow Mayor Sergei Sobyenin [announces](#) additional lockdown measures from **April 13-19** and introduces a digital pass system to allow residents to leave their homes for essential reasons.
- On **April 20**, around 2,000 people gather in Freedom Square in the heart of Vladikavkaz to [protest](#) the self-isolation order as the North Caucasus region [struggles](#) to cope with rising infections and a worsening economic situation.
- On **April 21**, Moscow's doctors [report](#) the first death among staff treating coronavirus patients in exclusive interviews with The Moscow Times.
- President Vladimir Putin announces the extension of the non-working month through **May 11**. Moscow's coronavirus lockdown is extended as infections rise — the capital's paramedics and drivers [tell](#) The Moscow Times they are catching the virus en masse.
- Increased strain on Russia's medical system prompts a government order requiring medical students to [work](#) in coronavirus hospitals. Students [interviewed](#) by The Moscow Times say they joined up under threat of academic repercussions and receive salaries that are drastically lower than promised.

May

- Moscow's coronavirus lockdown is extended until May 31, Mayor Sergei Sobyenin [announces](#) **May 7**. Russia's second-largest city of St. Petersburg follows suit. Some of Russia's LGBT youth tell The Moscow Times they are [struggling](#) with their mental health during lockdown.
- Moscow residents are required to wear face masks and gloves in all public places starting **May 12**.
- On **May 22**, the head of the state-run Gamaleya Research Center for Epidemiology and Microbiology [announces](#) that Russia has carried out its first test of a coronavirus vaccine on humans.
- As Russia prepares to emerge from a nationwide lockdown, many begin to question its low coronavirus fatality numbers but the WHO [dismisses](#) these concerns.

June

- Moscow ends its lockdown — including its digital pass system and rota for taking walks outside — on **June 9**. Coronavirus cases continue to rise by the thousands despite the “victory” [declared](#) by Moscow’s mayor.
- The first batch of Avifavir, the drug Russia has approved to treat coronavirus patients is [delivered](#) to some Russian hospitals on **June 11**. Meanwhile, Russia’s officials continue to advise usage of the controversial drug hydroxychloroquine or chloroquine for coronavirus treatment despite growing [resistance](#) from medics.
- Moscow's restaurants, gyms, swimming pools and public sports and recreation facilities reopen on **June 23**. With a month of summer nearly gone, Moscow’s tourism operators [pray](#) for borders to open.
- Russia holds its landmark Victory Day parade on Red Square on **June 24**, while several regions cancel their own Victory Day celebrations as cases rise.
- A nationwide vote on constitutional amendments vote kicks off on **June 25** despite the pandemic. Russia’s health workers treating coronavirus patients [say](#) they are being pressured to vote in favor of the changes.

July

- Russia [lifts](#) self-isolation requirements for arriving foreigners from **July 15**.
- The Defense Ministry completes the first clinical trials of a potential coronavirus vaccine on human volunteers, a lead military scientist [announces](#) **July 20**. Meanwhile, [reports](#) of worsening infection levels emerge from Baikonur, the Kazakh spaceport city rented by Russia.
- On **July 31**, Russia’s official number of cases reaches 839,981. More than 30,000 excess deaths are recorded in July.

August

- Russia resumes direct flights with Tanzania, Turkey, and Britain on **Aug. 1**. Still, most couples and families separated by closed borders earlier in the year are unable to [reunite](#).
- Russia registers the world’s first coronavirus vaccine, President Vladimir Putin [announces](#) **Aug. 11**.
- Russia confirms the production of the first batch of its coronavirus vaccine on **Aug. 15**.

September

- Russia’s total number of coronavirus cases surpasses 1 million, making it the fourth country after the United States, Brazil and India to reach the milestone.

— Russia [launches](#) Phase 3 trials of its Sputnik V coronavirus vaccine on **Sept. 9**. Hopes for the vaccine are high as the [economy](#) remains ill-prepared for a second lockdown, but leading scientists remain [skeptical](#) toward it.

— Moscow confirms more than 1,000 coronavirus cases on **Sept. 24** — the first time since June 23. As the second wave gathers pace, medics in hospitals across Russia [voice](#) frustration that authorities failed to use the summer respite to prepare for it.

— Moscow's coronavirus [hospitals](#) are at capacity and the authorities [move](#) to reinstate work-from-home orders for business and mandate a new round of self-isolation for elderly residents from **Sept. 28**.

October

— Russia approves its second coronavirus vaccine, President Vladimir Putin [announces](#) **Oct. 14**.

— Moscow authorities [introduce](#) a digital registration system for bars and nightclubs from **Oct. 19** but [deny](#) rumors of a return to a full lockdown.

— Russia's national carrier Aeroflot starts training [dogs](#) to detect Covid-19 in humans.

— Russia reinstates a nationwide mask mandate from **Oct. 28**.

— Moscow extends its requirement for 30% of all employees to work remotely through **Nov. 28**.

— With 47,000 deaths reported, October becomes Russia's [deadliest](#) month in a decade.

November

— Moscow [orders](#) all bars, restaurants, clubs and other nightlife establishments to close between 11 p.m. and 6 a.m. starting **Nov. 13**.

— As the situation beyond Moscow [worsens](#), the eastern Siberian republic of Buryatia [imposes](#) a second coronavirus lockdown from **Nov. 16** — the first region to do so during the second wave. The Moscow Times [reports](#) from one of Russia's poorest cities, Ivanovo, where morgues are overflowing.

— Russia rolls out a domestic coronavirus tracing app on **Nov. 24**.

— Moscow orders a further extension of measures aimed at slowing the spread of the coronavirus until **Jan. 15** as a shortage of hospital beds forces the authorities to [convert](#) the capital's main speed-skating rink into a makeshift treatment center.
