Outsourcing Emissions: China's Oil and Gas Ventures in Central Asia

Eurasian Climate Brief

February 24, 2022

In this episode we look into the impact of China's oil and gas ventures in Central Asia. "What?" I hear you ask. "I thought China was going green and aiming to reach net-zero before 2060?" Take a listen to find out more about the latest on the impact that China National Petroleum Corporation's is having on Kazakhstan. We'll also be bringing you the latest climate headlines from our region at the end of the episode.
