In Photos: The Aftermath of the Historic Earthquake in Russia's Far East

July 30, 2025

One of the strongest earthquakes ever recorded struck Russia's Kamchatka peninsula in the Far East early on Wednesday, triggering tsunami waves and dozens of aftershocks. Here is a look at photos from the aftermath of the magnitude 8.8 earthquake and the ensuing tsunami in the Sakhalin region and the Kamchatka region:

Sakhalin regional administration
